

Appl. No.: 10/692,472
Amdt. Dated: 11/18/2005
Off. Act. Dated: 07/20/2005

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (previously presented): A hand-held integrated remote control and massage device, comprising:

- a housing including at least one massage surface;
- a remote control input interface for enabling a user to control at least one electronic entertainment device; and
- at least one motor located at least partially within said housing for providing vibrating movement to said massage surface.

2. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, wherein said input interface enables control of one or more of a television, an audio system, a video disc player, a video cassette recorder, a direct broadcast satellite receiver, a personal video recorder, a cable box, digital portable music or portable entertainment systems.

3. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, wherein said input interface enables control of at least one electronic entertainment device by an electromagnetic communication.

4. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, further comprising at least one light source that selectively illuminates said input interface.

Appl. No.: 10/692,472
Amdt. Dated: 11/18/2005
Off. Act. Dated: 07/20/2005

5. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, wherein said input interface comprises a touch screen.

6. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, wherein said input interface comprises a touch pad or buttons.

7. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, further comprising a device locator.

8. (previously presented): A hand-held integrated remote control and massage device as recited in claim 7, wherein said device locator comprises a receiver and one of a speaker or a flashing light source.

9. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, wherein said housing further comprises a gripable portion including ribs that facilitate gripping of the gripable portion by a user's hand.

10. (previously presented): A hand-held integrated remote control and massage device as recited in claim 9, wherein at least a portion of said gripable portion comprises at least one of plastic or thermoplastic elastomer.

11. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, wherein said input interface includes a switch for activating said at least one motor for providing vibrating movement to said massage surface.

Appl. No.: 10/692,472
Amdt. Dated: 11/18/2005
Off. Act. Dated: 07/20/2005

12. (previously presented): A hand-held integrated remote control and massage device as recited in claim 11, wherein said remote control input interface deactivates control over said electronic entertainment device while said at least one motor is active in order to avoid sending inadvertent commands.

13. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, wherein at least a portion of said massage surface comprises one or more removable massage attachments.

14. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, further comprising at least one heating element that selectively provides heat to said massage surface.

15. (previously presented): A hand-held integrated remote control and massage device as recited in claim 14, said heating element comprising at least one infra-red device.

16. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, wherein said housing is sealed so as to prevent or inhibit water or other liquids from entering the device.

17. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, further comprising at least one chamber and electronic interface that allows the device to operate using one or more disposable batteries.

18. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, further comprising at least one rechargeable battery.

Appl. No.: 10/692,472
Amdt. Dated: 11/18/2005
Off. Act. Dated: 07/20/2005

19. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, further comprising a flashlight at least partially enclosed within said housing.

20. (previously presented): A hand-held integrated remote control and massage device as recited in claim 19, wherein said flashlight comprises one or more LEDs.

21. (previously presented): A hand-held integrated remote control and massage device as recited in claim 1, further comprising a sound recorder at least partially enclosed within said housing.

22. (previously presented): A hand-held integrated remote control and massage device as recited in claim 21, wherein said sound recorder comprises at least one memory device and at least one activation switch.

23. (previously presented): A hand-held integrated remote control, massage and sound recording device, comprising:
a housing including at least one massage surface;
a remote control input interface, at least partially enclosed within said housing, that enables a user to selectively control at least one electronic entertainment device;
at least one motor located at least partially within said housing for providing vibrating movement to said massage surface; and
a sound recorder at least partially enclosed within said housing.

Appl. No.: 10/692,472
Amdt. Dated: 11/18/2005
Off. Act. Dated: 07/20/2005

24. (previously presented): A hand-held integrated remote control, massage and flashlight device, comprising:
a housing including at least one massage surface;
a remote control input interface, at least partially enclosed within said housing, that enables a user to selectively control at least one electronic entertainment device;
at least one motor located at least partially within said housing for providing vibrating movement to said massage surface; and
a flashlight at least partially enclosed within said housing.

25. (canceled)
